DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species I in the reply filed on 2/03/2006 is acknowledged. Claims 1-34 have been withdrawn as being directed to a non-elected species. Claim 1 recites that the winged needle includes a lateral piece extending from two lateral sides of the winged needle body and the winged needle cover includes a holding portion. However, in the elected species, Figures 9,9A-9C, the lateral pieces (12) are extending from the winged needle cover and the holding portion (24) is located on the winged needle body. Claims 2-34 are withdrawn because they are dependent upon the independent claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 35 is rejected under 35 U.S.C. 102(b) as being anticipated by Fabozzi (5,498,241). Fabozzi discloses a safety winged set (12) comprising a needle provided with a needle body (32) and at least one holding portion (36) extending from the periphery of said body and wherein said needle body is fitted with an injection needle (22) at the front end thereof and a flexible tube (4) connected with the rear end of the needle and a winged needle cover (42) provided with at least one gliding slot (52) on at least one side thereof corresponding to said holding portion of said needle.
